## A look inside of our new End-of-Life Tyre Recycling Facility

It has been a busy couple of months for HADCO's Recycling Division! Nonetheless, we are pleased to announce that we are pre-commissioning our End-of-Life Tyre Recycling Facility and are testing all mechanical equipment.

According to Kevin Whiteman, Managing Director, HADCO Recycling Division, "It is important for us to understand the capacity of the machinery before we go fully live." He further noted that "Since a project of this scale has not fully been realised on the island before, we want to start up the plant to ensure we can meet the needs of our country."

It is estimated that 1.5 million used tyres are disposed of every year in Trinidad and Tobago, and hopefully, our new End-of-Life Tyre Recycling Facility can help responsibly dispose of these bulky waste tyres through various degrees of shredding.

In this issue of The Recycling Times, we are pleased to invite you for an exclusive look inside our newest addition to the HADCO Recycling Division.

---

**"WE ARE EXCITED TO ANNOUNCE THE SOFT LAUNCH OF OUR END-OF-LIFE TYRE RECYCLING FACILITY. THIS IS A NATURAL EXTENSION OF OUR CONTINUED COMMITMENT TO ENSURING THAT WE LEAVE A CLEANER AND GREENER COUNTRY FOR FUTURE GENERATIONS."**

Kevin Whiteman -  
Managing Director,  
Recycling Division,  
HADCO Group

## A Look Inside

Located in Freeport, our facility houses machinery to extract steel wire, as well as shred and grind the tyres into various sizes. These products can be used as raw materials for new steel wire, and rubber-based products.
